

##CRISCd - Information Technology and Security Principles

###Objectives:

At the end of this episode, I will be able to understand:

1. Systems exist in all organizations
2. There is a lifecycle associated with systems and their development called SDLC
3. SDLC can stand for Software Development Lifecycle as well
4. A SDLC is a methodology intended to support effective project management
5. Key security tasks performed as part of SDLCs:
 - Document the risk
 - Security categorization
 - What are the CIA requirements?
 - Privacy impact assessment
 - Vendor/Supplier risk assessment
 - Waterfall or Agile methodology

Additional resources used during the episode can be obtained using the download link on the overview episode.
