

##CRISCd - Information Technology and Security Principles

###Objectives:

At the end of this episode, I will be able to understand:

1. Risk practitioners need to understand the scope of network and information architecture
2. Enterprise view of the architecture allows you to see the link between IT and the company's strategic objectives
3. Organizations commonly use EA frameworks to help make it easier
4. The four questions to ask (the 4 "are's"):
 - Are we doing the right things?
 - Are we doing them the right way?
 - Are we getting them done well?
 - Are we seeing expected benefits?
5. Enterprise Architecture categories:
 - DOCUMENTATION – ways to present the architecture in terms of a particular taxonomy or nomenclature depending on the audience
 - NOTATION – ways to visualize the architecture in a standardized way
 - PROCESS – the goals, inputs, actions, and outputs that occurs in building architecture.
 - ORGANIZATION – Skill sets
